

Roadrunner Financial Verification Requirements

What do we need to know?

Roadrunner Financial uses public data to verify your customers' information and income instantly to match the speed of your retail business. At times, we may also need to gather documents to verify and authenticate your customer's identification, address, income and insurance coverage.

Why do we need this?

We have to check the identity and verify the income of all our customers, to comply with money laundering regulations and to take the necessary steps to prevent fraud. In many cases we are able to use public data for verification. When we can't, we require documentation from the applicant. These regulations aim to stop criminals using financial products and services to launder money or for other fraudulent purposes. They also protect you and your customers from criminals who might try to use your customers identity without their knowledge. As a result you will be asked to provide the following documentation (which will be retained for our records).

Applicant Minimum Eligibility

All applicants must meet the following minimum eligibility:

- Social Security Number (cannot accept ITIN)
- \$1,350 or greater monthly gross income
